Advisory Action Before the Filing of an Appeal Brief

Application No.	Applicant(s)	
10/550,890	FOCKE ET AL.	
Examiner	A 4 1 ! 4	
Examiner	Art Unit	

	CHRISTOPHER DEMEREE	3782				
The MAILING DATE of this communication appe	ears on the cover sheet with the c	correspondence add	ress			
THE REPLY FILED <u>07 April 2010</u> FAILS TO PLACE THIS APF	LICATION IN CONDITION FOR AL	LOWANCE.				
1. The reply was filed after a final rejection, but prior to or on application, applicant must timely file one of the following application in condition for allowance; (2) a Notice of Application (RCE) in compliance with 37 Continued Examination (RCE) in compliance with 37 Continued Examination.	replies: (1) an amendment, affidavit eal (with appeal fee) in compliance	t, or other evidence, v with 37 CFR 41.31; o	which places the r (3) a Request			
periods: a) The period for reply expires <u>4</u> months from the mailing date	of the final rejection.					
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.						
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWC MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).						
Extensions of time may be obtained under 37 CFR 1.136(a). The date have been filed is the date for purposes of determining the period of exunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b)	tension and the corresponding amount of shortened statutory period for reply origing than three months after the mailing date	of the fee. Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues (1) that it would not have been obvious to modify Focke to have material strips formed at an angle of 30 degrees to the box front wall and an angle of 60 degrees to the transverse side wall. Applicant also argues (2) that Focke cannot be modified by Bohdan to form a cigarette package comprising a 2-3-2 configuration of the cigarettes contained within.

- (1) Examiner notes that Focke is silent as to the specific angular measurements of the material strips that form the octagonal cross-sectional shape of the package. Furthermore, Examiner notes the claims recite angles that are "approximately" 30 degrees and 60 degrees, thus inferring a range of angular measurements. Therefore, it would have been obvious to one of ordinary skill in the art to construct an octagonal cigarette package wherein the material strips constituting the corners of said octagonal shape are formed at angles of approximately 30 degrees to the front wall and approximately 60 degrees to the side wall.
- (2) Examiner notes that Focke is silent as to the specific configuration of the cigarettes to be held within his cigarette package. However, Examiner notes that Focke does teach that the octagonal contour of the package is made with consideration for space and material savings (Focke; Col 4 lines 38-50). Bohdan teaches a configuration for cigarettes of the 2-3-2 orientation disclosed in the present application. Bohdan also discloses an exit portion of a cigarette package having an octagonal cross-sectional shape (see Fig. 4; element 44). Examiner notes that Bohdan discloses more than just the oval cross section. Therefore, it would have been obvious to apply Bohdan's cigarette configuration in order to continue the space saving consideration (Bohdan; Col 2 lines 3-12).
